Jamaica's Net International Reserves Up in February

According to the Bank of Jamaica (BOJ), Jamaica's Net International Reserves (NIR) increased by US\$86.53 million, or 2.41% to US\$3.68 billion in March 2022. The jump in reserves was mainly driven by an increase of US\$64.03 million in foreign assets coupled with a decline of US\$22.50 million in foreign liabilities. The rise in foreign assets was attributable to growth in 'Currency and Deposits', 'Special Drawing Rights (SDR) & International Monetary Fund (IMF) Reserve Position' and 'securities'. Meanwhile, foreign liabilities fell due to a decline in IMF liabilities.

On a year-to-date basis the NIR has increased by 4.79%, and at its current level, represents approximately 46 weeks of goods and services imports, which more than triple the 12-week benchmark. This relatively healthy NIR level sends a positive signal about the country's ability to respond to economic shocks for example, the ongoing pandemic. Although the COVID-19 cases have decline significantly from the peak seen in January and the labour market has shown signs of improvement, the uncertainty surrounding the virus is still high. Global markets have also been hampered by the geopolitical tension between Russia and Ukraine which has exacerbated supply bottleneck and pushed many prices higher locally and in key markets. With these developments we anticipate that foreign exchange flows could be limited in the short term, which could put a strain on NIR over the period.
