

## Jamaica's Mining and Quarrying Producer Price Index increased by 10.9% Year over Year in March 2021

According to the Statistical Institute of Jamaica (STATIN), the Producer Price Index (PPI) for the Mining and Quarrying industry increased by 3.7% month – over – month in March 2021, while the PPI for the Manufacturing industry increased by 2.8%. The PPI measures the average change in the selling prices received by domestic producers of goods and services over time. The increase in the Mining and Quarrying industry's PPI was primarily influenced by the 3.8% and 1.8% increases in the Indexes for the 'Bauxite Mining & Alumina Processing' and 'Other Mining & Quarrying' groups, respectively. The increase in the PPI for the Manufacturing industry was driven by increases in the 'Refined Petroleum Products', 'Food, Beverages & Tobacco' and 'Fabricated Metal Products' groups, by 8.0%, 1.7%, and 8.1%, respectively. Year – over – year, between March 2020 and March 2021, the Index for the Mining and Quarrying industry increased by 10.9% due to an increase in Bauxite Mining and Alumina Processing, while the Index for the Manufacturing industry rose by 7.5%.

Manufacturing, mining and quarrying production have increased globally as economic activity picked up after declining dramatically early in 2020. Undoubtedly, the increase in manufacturing has been boosted by the continued roll-out of the vaccination programme as well as additional stimulus measures taken by many advanced economies to spur spending. While further increases may be anticipated, as normality gradually returns, uncertainty remains high especially considering the recent spikes in COVID-19 and its many variants, which could have a negative impact on demand and supply chains going forward.

The holding company, JMMB Group Limited, was formed as a parent to house the group of companies. To date, the JMMB Group Ltd. has extended its reach across the Caribbean, including the Dominican Republic and Trinidad and Tobago. The Group has over 316,000 clients and continues to grow steadily. We believe that in addition to its core businesses, key strategic partnerships such as the 22.2% stake in Sagor Financial Corporation allows JMMBGL to achieve further diversification and increased profitability.</p>

Over the last five years the company has gone through a tremendous transformation driven by its organic growth in its primary distribution segment and through acquisitions. Consequently, it has delivered expansion which has seen its revenue more than double in five years and profits more than tripled. Although the coronavirus pandemic has slowed business activity in Jamaica generally, and has slowed Derrimon's revenue growth by approximately 1.0% up to September 2020, DTL has remained very profitable. Over the period, the Group delivered profit growth of 27.0% which is a signal of its strength and resiliency given the context of the COVID-19 pandemic.</p>

Although the COVID-19 pandemic has had a negative impact on Seprod's operations, the Group's diversified portfolio has proven to be resilient thus far. Looking ahead, there are still risks that could negatively impact global supply chains and ultimately affect raw material prices, consumer income and economic growth. Notwithstanding, given our estimate that the worst part of the covid-19 restrictions may be behind us, we are expecting that the companies good performance could likely continue into at least the short term. Over the last five years, the group has invested significantly in strengthening its operations and its resiliency. The investments include consolidating aspects of its business where costs were being duplicated, which is a move to position itself for continued resilience and competitiveness in face of the uncertainty which lies ahead. Over the medium-term, the group has further investments plans to improve its distribution, warehousing and logistics efforts that are expected to augment the Groups' profitability over time.</p>

The first is diversification, as it is an alternative energy investment which becomes more crucial in the midst of global warming. The second is an increase in medium to long term value driven by profitability. The third is liquidity as the availability of shares is wide and allows a tidy entry into or exit out of the investment. Wigton Windfarm has potential competition from MPC Caribbean and New Fortress Energy but they together form an ecosystem which is needed to move the Caribbean away from its reliance on Fossil Fuels, the 2nd most expensive item on Jamaica's import bill.</p>

The Company's Jamaican operations continue to have a significant impact in the local marketplace through its Best Dressed Chicken and Hi-Pro divisions. However, the local market is mature with growth expected to be low in the medium term. With operations already firmly set in Haiti, JBG moved further to cement a stronghold and presence along the supply chain in the US with its recent acquisitions. In our view, these acquisitions and other inorganic initiatives are expected to be the catalyst for JBG's growth going forward.</p>

As a result of the social distancing orders being enforced by the Government to curb the spread of the virus, the operations of the Company's customers base have been severely disrupted. We acknowledged, however, that the Company's strong brand presence in the food manufacturing and distribution sector, strong balance sheet and distribution network will go a far way to ensure that Wisynco remain resilient over the long-term. We believe that the Management's experience in distribution and the Company's investment in Innovation will be huge drivers of equity return over time. Notwithstanding, over the short to medium term (up to three years) Wisynco's profitability will be challenged as over 95% of the Company's revenues are generated locally and local consumer demand has declined and likely to remain subdued over the short to medium term. In our scenario, the Company is projected to return to pre-COVID state in the FY 2024/FY 2025.</p>
