Jamaica's Net Remittance Inflows as at June 2020 Higher than Anticipated

The Bank of Jamaica's (BOJ) latest Remittances Bulletin shows net remittances inflows for June 2020 increasing by 49% or US\$85 million to US\$258.3 million compared to the US\$173.3 million recorded in June 2019. This improvement is reflective of an increase in gross remittance inflows of 41.6% or US\$80.8 million, attributable to increases in inflows from remittance companies and other remittances, while remittance outflows decreased by 20.1% or US\$4.2 million. The United States of America (USA) remained Jamaica's largest source of remittances in June, followed by Canada, United Kingdom (UK), and the Cayman Islands, with a ratio of 69.3%, 10.9% 10.6%, and 5.4%, respectively. For the April to June period, net remittance inflows increased by 20.9% to close at \$641.9 million compared to the \$531.0 million recorded in the corresponding period of last year.

Despite the increase in net remittance inflows to the country, the ongoing uncertainty surrounding the duration of the coronavirus pandemic continues to pose downside risks to the global economy, particularly as it relates to employment, consumer demand and business activity which could negatively affect remittance inflows to Jamaica over the ensuing months. Therefore, the performance of net remittance into Jamaica will be highly dependent on the economic recovery in the countries providing the largest shares of remittance flows to Jamaica over the coming periods.

The Company's Jamaican operations continue to have a significant impact in the local marketplace through its Best Dressed Chicken and Hi-Pro divisions. However, the local market is mature with growth expected to be low in the medium term. With operations already firmly set in Haiti, JBG moved further to cement a stronghold and presence along the supply chain in the US with its recent acquisitions. In our view, these acquisitions and other inorganic

Notwithstanding, over the short to medium term (up to three years) Wisynco's profitability will be challenged as over 95% of the Company's revenues are generated locally and local consumer demand has declined and likely to remain subdued over the short to medium term. In our scenario, the Company is projected to return to pre-COVID state in the FY 2024/FY 2025.

As thousands of Jamaicans have lost their jobs, unemployment will likely increase in the short to medium term. Even in cases where jobs are retained, some employers have looked to salary cuts in keeping employees. With the expected reduction in income it is likely that the support for the company's "normal goods" will be low.
