

## United Kingdom Retail Sales Surged in November 2021

According to the Office for National Statistics (ONS), retail sales in the United Kingdom (UK) increased by 1.4% month-over - month in November, following the 1.1% increase in October. November's sales exceeded market expectations for a 0.8% increase and is 7.2% higher than the decline seen in February 2020, before the impact of the pandemic had set in. Retail sales in November were boosted by the 2.0% increase in non-food stores sales, owing to growth in clothing stores and other non-food stores such as computer stores, toy stores and jewellery stores. Retailers referenced the strong Black Friday sales as a main driver to the increase. Automotive fuel sales volumes rose by 3.7% in November 2021 following some supply disruption in the previous two months while food store sales volumes fell by 0.2% in the period. The proportion of retail sales completed online fell to 26.9% in November 2021, its lowest proportion since March 2020 (22.6%) and a continuation of a falling trend since its peak in February 2021 (36.8%) and was likely a sign that shoppers opted for in-stores purchases as restrictions eased.

November's retail sales were stronger than expected and reaffirmed a solid start to economic growth in the final quarter as households started Christmas shopping early, probably to avoid supply issues and inflated prices in December. Additionally, as November figures pre-date the spread of the Omicron variant in Britain the outlook for retail sales in December is highly uncertain and when combined with the already elevated inflation is likely to lead to low consumer demand and restricted economic growth in the short term.

Guardian Holdings Ltd. (GHL)	Current Price	\$507.34	EPS	\$70.00	ROE	15.29%	  	ROE	14.45%	<p>Guardian is one of the region's leading financial institutions with a long history of delivering strong revenue growth and profitability. The company operates in most of the countries in the Caribbean and is rated among the top five in the major markets in which it operates. Like most companies regionally, the Guardian Group was severely challenged in 2020. However, in 2020, the Group delivered operational and financial results which were creditable along several metrics and especially when taken in the context of the pandemic. While we are very aware that the COVID-19 pandemic is not over, it is very likely that the worst is behind us. With vaccination programme being rolled out regionally and as respective governments continue to ease out of the pandemic the companies within the region continue to gradually recover from the crisis. This recovery is also evident for Guardian Group which posted revenues and profits in Q1 2021 which are significantly above its previous year's.</p>

Derrimon Trading Co Ltd (DTL)	Current Price	\$2.27	EPS	\$0.10	ROE	8.35%	  	ROE	16.48%	<p>Derrimon is vertically integrated whereby it manufactures and distributes through its own channels such as Sampars and its Select grocers retail outlets. Over the last five years the company has gone through a tremendous transformation driven by its organic growth in its primary distribution segment and through acquisitions. Consequently, it has delivered expansion which has seen its revenue more than double in five years and profits more than tripled. Although the coronavirus pandemic has slowed business activity in Jamaica generally, and has slowed Derrimon's revenue growth by approximately 1.0% up to September 2020, DTL has remained very profitable. Over the period, the Group delivered profit growth of 27.0% which is a signal of its strength and resiliency given the context of the COVID-19 pandemic.</p>

Seprod Ltd (SEP)	Current Price	\$62.83	EPS	\$2.85	ROE	11.53%	  	ROE	15.47%	<p>With the onset of COVID-19, restaurants, supermarkets, bakeries and corner shops in communities have been forced to operate within restricted parameters or have completely shuttered. Although the COVID-19 pandemic has had a negative impact on Seprod's operations, the Group's diversified portfolio has proven to be resilient thus far. Looking ahead, there are still risks that could negatively impact global supply chains and ultimately affect raw material prices, consumer income and economic growth. Notwithstanding, given our estimate that the worst part of the covid-19 restrictions may be behind us, we are expecting that the company's good performance could likely continue into at least the short term. Over the last five years, the group has invested significantly in strengthening its operations and its resiliency. The investments include consolidating aspects of its business where costs were being duplicated, which is a move to position itself for continued resilience and competitiveness in face of the uncertainty which lies ahead. Over the medium-term, the group has further investments plans to improve its distribution, warehousing and logistics efforts that are expected to augment the Groups' profitability over time.</p>

Jamaica Producers Group (JP)	Current Price	\$23.48	EPS	\$1.12	ROE	7.80%	  	ROE	11.53%	<p>Undoubtedly, COVID-19 has had a negative impact on aspects of the business and is likely to continue to weigh on those segments for the remainder of this year, even as the company adjusts its operations to deal with the pandemic. Some segments have remained strong however, the pandemic has created opportunities for new retail channels to offset the downturn seen in some segments. Importantly, JP is further seeking to strengthen its business over the medium term to improve its capacity, to drive long term growth at the same time it continues to invest in strong food and logistics businesses. Despite COVID-19, JP remains strong with several key financial metrics, including its large and growing cash and securities balance, providing the group with the flexibility to manage and execute on strategies of acquiring undervalued assets.</p>

Wisynco Ltd (WISYNCO)	Current Price <b>\$16.67</b>	EPS \$0.85	 <b>ROE 19.89%</b>	<b>ROE 15.47%</b>	Wisynco's customers typically include restaurants, supermarkets retail and wholesale outlets, schools and other food service outlets. As a result of the social distancing orders being enforced by the Government to curb the spread of the virus, the operations of the Company's customers base have been severely disrupted. We acknowledged, however, that the Company's strong brand presence in the food manufacturing and distribution sector, strong balance sheet and distribution network will go a far way to ensure that Wisynco remain resilient over the long-term. We believe that the Management's experience in distribution and the Company's investment in Innovation will be huge drivers of equity return over time. Notwithstanding, over the short to medium term (up to three years) Wisynco's profitability will be challenged as over 95% of the Company's revenues are generated locally and local consumer demand has declined and likely to remain subdued over the short to medium term. In our scenario, the Company is projected to return to pre-COVID state in the FY 2024/FY 2025.

Barita Investments Ltd (BIL)	Current Price <b>\$90.08</b>	EPS \$3.37	 <b>ROE 11.27%</b>	<b>ROE 14.45%</b>	In the most recently concluded 9-month period, up to June 30, 2021, Barita continued to deliver recordbreaking growth and profitability for its shareholders. Undoubtedly, the COVID-19 pandemic has disrupted financial markets locally and globally and is likely to pose significant challenges for businesses going forward. So far, however, BIL has responded well to the pandemic from a social and operational perspective. Over the period, the Group posted net profits, which was 83% above the amount generated over a similar period in the previous year and already ~22% above the amount generated in the entire 12 months in FY 2020. Following its successful APO in September 2020, BIL bolstered its investment banking underwriting capabilities, upgraded its technology - including the implementation of its BOSS platform, seeded alternative investment strategies, widened its footprint and expanded its trading operations. So far, the early indications are that the company has seen further operational improvement and is experiencing accelerated revenue and profit growth.

Grace Kennedy Ltd (GK)	Current Price <b>\$98.82</b>	EPS \$7.51	 <b>ROE 11.48%</b>	<b>ROE 11.53%</b>	Going forward, we expect the GK's strong resiliency to continue despite COVID-19, even as the company make significant changes to ensure its products and services are delivered to its customers across the various channels. These include ensuring its international supply chains remain strong, active, and efficient. Its recent agreement with Nestle is one such initiative that GK has implemented to improve its distribution as the Group moves closer to achieving its goal of creating a wider wingspan in the global arena. We believe that GK is poised for further sustainable growth given its well diversified businesses across its two segments which will likely be boosted by inorganic growth from acquisitions. GraceKennedy Limited has initiated its multi-year transformational strategy in which it seeks to achieve (i) sustainable efficiency, (ii) greater agility and (iii) revenue growth. To achieve these goals, the Group has made changes to its organisational and cost structure as well as its business processes which have so far resulted in an upswing in its margins and profitability, and which augurs well for the Group's future. With growth in all segments, the Group outperformed its prior year results, posting arguably its strongest financial results since inception. GK is well positioned financially and has displayed the ability to continue growing despite the economic downturn caused by the effects of COVID-19.

Sygnus Real Estate Finance Limited (SRFMD)	Current Price <b>\$15.21</b>	EPS \$7.18	 <b>ROE 37.39%</b>	<b>ROE 8.05%</b>	Sygnus Real Estate Finance Limited is a speciality real estate investment company, dedicated to providing flexible financing to unlock value in real estate assets across the Caribbean region. SRF is an alternative investment firm that is solely dedicated to the real estate asset class, by providing customized financing solutions in various forms across the credit and equity spectrum. Through the application of flexible financing, and with careful screening, managing and assessment of its highly experienced Real Estate Investment Advisory Committee, SRF will seek to earn attractive risk-adjusted returns with downside protection. We believe that Sygnus Real Estate Finance's offer is a good investment opportunity given the business model of active management, track record of the Investment Manager, robust governance structure and the pipeline of opportunities on the table. Given the present economic environment and market dynamics characterised by low-interest rates and high liquidity, we anticipate that real estate could continue to perform well as a leading growth sector. Additionally, the low-interest rate may enable the use of financial leverage to enhance returns which could further enhance the value proposition of SRF.
