

## Eurozone's Economic Sentiment Declines in January

According to the European Commission, the Eurozone's Economic Sentiment Indicator (ESI), which measures business and household confidence, fell to 112.7 in January 2022 from 113.8 in December 2021 as expectations about the general economic situation worsened, which was likely due to rising concerns over the spread of the virus. January's reading was lower than market expectations for a reading of 114.0 and was at its lowest levels since April 2021. Confidence declined across most categories including consumer, industry, service, and construction. However, the decline was slightly offset by an increase in confidence for the category retail trade. Despite the drop, the index remained at historically high levels and was well above the 104.0 pre-pandemic figure registered in February 2020. The ESI improved in Spain, Germany, but worsened in Italy, France and Netherlands.

Although some countries in the region have indicated plans to ease restrictions, the ongoing presence of COVID-19 in particular the Omicron variant could continue to weigh on both business and consumer sentiment over the short term and by extension the region's growth. Other downside risks likely to impact economic sentiments over the short term include the unevenness of recovery in the region, tighter containment measures, prolonged supply chain disruptions, as well as the possibility of higher inflation expectations.

The company operates in most of the countries in the Caribbean and is rated among the top five in the major markets in which it operates. Like most companies regionally, the Guardian Group was severely challenged in 2020. However, in 2020, the Group delivered operational and financial results which were creditable along several metrics and especially when taken in the context of the pandemic. While we are very aware that the COVID-19 pandemic is not over, it is very likely that the worst is behind us. With vaccination programme being rolled out regionally and as respective governments continue to ease out of the pandemic the companies within the region continue to gradually recover from the crisis. This recovery is also evident for Guardian Group which posted revenues and profits in Q1 2021 which are significantly above its previous year's.</p>

Over the last five years the company has gone through a tremendous transformation driven by its organic growth in its primary distribution segment and through acquisitions. Consequently, it has delivered expansion which has seen its revenue more than double in five years and profits more than tripled. Although the coronavirus pandemic has slowed business activity in Jamaica generally, and has slowed Derrimon's revenue growth by approximately 1.0% up to September 2020, DTL has remained very profitable. Over the period, the Group delivered profit growth of 27.0% which is a signal of its strength and resiliency given the context of the COVID-19 pandemic.</p>

Although the COVID-19 pandemic has had a negative impact on Seprod's operations, the Group's diversified portfolio has proven to be resilient thus far. Looking ahead, there are still risks that could negatively impact global supply chains and ultimately affect raw material prices, consumer income and economic growth. Notwithstanding, given our estimate that the worst part of the covid-19 restrictions may be behind us, we are expecting that the companies good performance could likely continue into at least the short term. Over the last five years, the group has invested significantly in strengthening its operations and its resiliency. The investments include consolidating aspects of its business where costs were being duplicated, which is a move to position itself for continued resilience and competitiveness in face of the uncertainty which lies ahead. Over the medium-term, the group has further investments plans to improve its distribution, warehousing and logistics efforts that are expected to augment the Groups' profitability over time.</p>

Some segments have remained strong; however, the pandemic has created opportunities for new retail channels to offset the downturn seen in some segments. Importantly, JP is further seeking to strengthen its business over the medium term to improve its capacity, to drive long term growth at the same time it continues to invest in strong food and logistics businesses. Despite COVID-19, JP remains strong with several key financial metrics, including its large and growing cash and securities balance, providing the group with the flexibility to manage and execute on strategies of acquiring undervalued assets.</p>

Wisynco Ltd (WISYNCO)	Current Price <b>\$17.53</b>	EPS \$0.05	 <b>ROE 410.18%</b>	<b>ROE 14.78%</b>	Wisynco's customers typically include restaurants, supermarkets retail and wholesale outlets, schools and other food service outlets. As a result of the social distancing orders being enforced by the Government to curb the spread of the virus, the operations of the Company's customers base have been severely disrupted. We acknowledged, however, that the Company's strong brand presence in the food manufacturing and distribution sector, strong balance sheet and distribution network will go a far way to ensure that Wisynco remain resilient over the long-term. We believe that the Management's experience in distribution and the Company's investment in Innovation will be huge drivers of equity return over time. Notwithstanding, over the short to medium term (up to three years) Wisynco's profitability will be challenged as over 95% of the Company's revenues are generated locally and local consumer demand has declined and likely to remain subdued over the short to medium term. In our scenario, the Company is projected to return to pre-COVID state in the FY 2024/FY 2025.

Barita Investments Ltd (BIL)	Current Price <b>\$92.22</b>	EPS (\$0.06)	 <b>ROE 310.50%</b>	<b>ROE 14.78%</b>	In the most recently concluded 9-month period, up to June 30, 2021, Barita continued to deliver recordbreaking growth and profitability for its shareholders. Undoubtedly, the COVID-19 pandemic has disrupted financial markets locally and globally and is likely to pose significant challenges for businesses going forward. So far, however, BIL has responded well to the pandemic from a social and operational perspective. Over the period, the Group posted net profits, which was 83% above the amount generated over a similar period in the previous year and already ~22% above the amount generated in the entire 12 months in FY 2020. Following its successful APO in September 2020, BIL bolstered its investment banking underwriting capabilities, upgraded its technology - including the implementation of its BOSS platform, seeded alternative investment strategies, widened its footprint and expanded its trading operations. So far, the early indications are that the company has seen further operational improvement and is experiencing accelerated revenue and profit growth.

Grace Kennedy Ltd (GK)	Current Price <b>\$102.78</b>	EPS \$0.03	 <b>ROE 157.18%</b>	<b>ROE 11.53%</b>	Going forward, we expect the GK's strong resiliency to continue despite COVID-19, even as the company make significant changes to ensure its products and services are delivered to its customers across the various channels. These include ensuring its international supply chains remain strong, active, and efficient. Its recent agreement with Nestle is one such initiative that GK has implemented to improve its distribution as the Group moves closer to achieving its goal of creating a wider wingspan in the global arena. We believe that GK is poised for further sustainable growth given its well diversified businesses across its two segments which will likely be boosted by inorganic growth from acquisitions. GraceKennedy Limited has initiated its multi-year transformational strategy in which it seeks to achieve (i) sustainable efficiency, (ii) greater agility and (iii) revenue growth. To achieve these goals, the Group has made changes to its organisational and cost structure as well as its business processes which have so far resulted in an upswing in its margins and profitability, and which augurs well for the Group's future. With growth in all segments, the Group outperformed its prior year results, posting arguably its strongest financial results since inception. GK is well positioned financially and has displayed the ability to continue growing despite the economic downturn caused by the effects of COVID-19.

Sygnus Real Estate Finance Limited (SRFJMD)	Current Price <b>\$18.20</b>	EPS \$0.11	 <b>ROE 50.18%</b>	<b>ROE 12.30%</b>	Sygnus Real Estate Finance Limited is a speciality real estate investment company, dedicated to providing flexible financing to unlock value in real estate assets across the Caribbean region. SRF is an alternative investment firm that is solely dedicated to the real estate asset class, by providing customized financing solutions in various forms across the credit and equity spectrum. Through the application of flexible financing, and with careful screening, managing and assessment of its highly experienced Real Estate Investment Advisory Committee, SRF will seek to earn attractive risk-adjusted returns with downside protection. We believe that Sygnus Real Estate Finance's offer is a good investment opportunity given the business model of active management, track record of the Investment Manager, robust governance structure and the pipeline of opportunities on the table. Given the present economic environment and market dynamics characterised by low-interest rates and high liquidity, we anticipate that real estate could continue to perform well as a leading growth sector. Additionally, the low-interest rate may enable the use of financial leverage to enhance returns which could further enhance the value proposition of SRF.
